

MUD LOGGER

Field Engineer

Romania based and neighbouring countries

GEOLOG

Geolog is an independent and privately owned international oilfield services company with Headquarters in Dubai, Milan and Amsterdam, and operations in 35+ countries. The Company delivers field-based Realtime & near Realtime solutions for the improvement of Drilling time and Costs and reservoir evaluation, within the Exploration, Appraisal and Development of Drilling Projects.

THE POSITION

We seek young highly motivated candidates with a geological, petroleum engineering or related studies background, with or without experience in the Oil & Gas field.

The primary duties of a Mud Logger consist of:

- Real time monitoring of drilling activity onsite and sample collection, preparation and description
- Lending onsite technical support in case of equipment failure
- Having a proactive attitude towards the health and safety and ensuring a safe working environment
- Assisting the well site geologist during "coring operations"
- Shift work conditions and rotations

REQUIREMENTS

- A University degree in Geological Sciences, Petroleum Engineering or similar
- Fluent in English both oral and written
- Able to pass a medical exam for working in the oil and gas offshore industry
- Strong communication and interpersonal skills
- Ability to cope with the challenging work environment of the oil industry, and willing to work on rotations (7 days a week, 12 hours a day for 2-3 weeks at a time)
- Driving License
- Available to travel on short notice in country or abroad.
